

**San Kiang, Eng.Sc.D.**  
**Director, Engineering Technologies, Process Research & Development**

Eng. Sc. D. 1978, Chemical Engineering, Columbia University, New York, NY USA.

Dr. Kiang joined Bristol-Myers Squibb in 1980 as a Research Investigator, where he participated in introducing processes to production scale in manufacturing plants around the world. His main projects include Taxol, Irbesartan, Epothilone, Clopidogrel, Aztreonam, Fosinopril, Captopril, and Abilify. He also participated in the development of many IND projects. His department is currently working on over thirty development projects.
