

Dr. Lambert is currently Senior Vice President, Pharmaceutical Development, at Pacira Pharmaceuticals, Inc. in San Diego (formerly SkyePharma Inc.). He provides strategic leadership to a team responsible for the development of new sustained-release injectable products with Pacira's two proprietary technologies, either alone or in collaboration with other biotech and pharmaceutical companies.

Prior to Pacira, he directed drug delivery, product development, and clinical supply groups at Eisai Inc. in Research Triangle Park, North Carolina. He held various positions at Pfizer Central Research where his group was responsible for parenteral and enteral liquid formulations of human and animal health drug candidates. In addition, he worked in the areas of preformulation, sterile product development and biotechnology drug delivery at the Upjohn Company.

Dr. Lambert received his B.S. in Pharmacy from the University of Rhode Island followed by graduate studies in Pharmaceutics at the Universities of Michigan and Utah. He was an NPC Intern at Lederle Laboratories, a Pharmacy Research Summer Scholar at The Upjohn Company, and a recipient of the J.K. Lilly Memorial Fellowship of the American Foundation for Pharmaceutical Education. He has over 25 peer reviewed publications, is a member of the Advisory Boards of J. Pharm. Sci. and the Handbook of Pharmaceutical Excipients, and is past chair of the Pharmaceutical Technologies Section of the American Association of Pharmaceutical Scientists.
