Kenneth L. (“Ken”) Audus holds a B.S. degree in Chemistry from the University of South Dakota in 1980 and a Ph.D. in Pharmacology from the University of Kansas Medical Center in 1984. After completing postdoctoral work in Pharmaceutical Chemistry at the University of Kansas, he joined the faculty of that Department in 1986 and worked his way up through the academic ranks to become a Full Professor in 1996 and then Chair of the Department in 1998. He is also a Professor of Molecular & Integrative Physiology at the University of Kansas Medical Center in Kansas City, KS. Dr. Audus became Dean of the School of Pharmacy in April of 2004. His research interests have included the development and application of cell culture models to study drug distribution across the blood-brain barrier for the treatment of tumors and Alzheimer’s disease, and human trophoblast culture systems for studying how drug distribution across the placenta might be controlled and provide for safer drugs for mother and the fetus during pregnancy.

Dean Audus is the author or co-author of more than 155 research articles and the co-editor of one book on these topics. He is an Associate Editor for the *Journal of Pharmaceutical Sciences* and has served as an Associate Editor of the *Journal of Pharmacology and Experimental Therapeutics*, as a Council Delegate for pharmaceutical sciences for the American Association for the Advancement of Science, and as a member the editorial boards of *Current Pharmaceutical Design*, *Biological & Pharmaceutical Bulletin*, *International Journal of Pharmaceutics*, and *the Journal of Pharmacy and Pharmacology*. He serves as a consultant and on the Board of Trustees and/or Directors of a number of private and public foundations. Dean Audus is a Fellow of the American Association of Pharmaceutical Scientists and he has been recognized as an American Association of Colleges of Pharmacy Teacher of the Year and for Excellence in Undergraduate Teaching for Pharmaceutical Chemistry at the University of Kansas.
