Natalie D. Eddington, PhD, earned her BS Pharmacy, *summa cum laude*, from Howard University and her PhD from the University of Maryland School of Pharmacy. After a brief stint in the industry, Dr. Eddington joined the faculty at Maryland in 1991 and was appointed director of the Pharmacokinetics-Biopharmaceutics Laboratory in 1999. She spearheaded the development of pharmacokinetics and drug delivery in the PharmD and graduate programs. Dr. Eddington leads a successful research program aimed at better understanding in the role biopharmaceutics and pharmacokinetics in drug therapy. Her work has been supported by funding from NCI, NIMH, NIDA, FDA and the pharmaceutical industry. Dr. Eddington has a distinguished record of service. She has served as the chair of the Clinical Sciences Section of AAPS.
